Mohamed Tawfiq Cassim
Agri-Energy Connect Platform

App Overview:

The Agri-Energy Connect Platform is a web app that is designed to create and act as a collaboration hub to create a digital ecosystem where farmers, botanists, and agricultural experts can share knowledge in a safe and scalable place. It addresses real-world challenges farmers and agricultural experts face on a daily basis, by providing a place for farmers and experts to collaborate digitally these challenges are tackled head on. With the use of Agile approach alongside DevOps and the usage of TOGAF and ITIL together, ensure long-term use and scalability, built to make farmers lives simpler.
