Mohamed Tawfiq Cassim
AutoModate

App Overview:

AutoModate is a comprehensive mobile marketplace and service hub for vehicle owners and motor enthusiast, that joins aspects of automobiles and accommodation. The app acts an environment where users can buy and sell vehicles as well as vehicle parts, view local mechanic workshops near them, engage in a community filled with motorheads, where users can build new friendships and get inspiration/guidance. It is a mobile application that has been fully developed for working on any mobile android device, developed using Kotlin in Android Studio and Firebase. This app makes use of different authentication such as biometrics, google SSO, and simple username/password, users can use the app with its offline feature and any changes made will be synced when the device is back online. This app also allows users to change the screen mode between dark and light mode, as well as change the apps language for their preference, while keeping everything stored to Firebase.
